

TC_ID	Test Scenario	Test Steps	Expected Result	Priority
SEC_001	Verify coordinates are not exposed in network responses	Inspect Fetch/XHR responses in DevTools	Coordinates should not be visible	High
SEC_002	Verify answer location is not exposed before guess submission	Inspect network traffic before guessing	Actual location should remain hidden	High
SEC_003	Verify client-side responses do not contain exact latitude values	Review response payloads	Latitude should not be exposed	High
SEC_004	Verify client-side responses do not contain exact longitude values	Review response payloads	Longitude should not be exposed	High
SEC_005	Verify browser storage does not contain answer data	Check Local Storage and Session Storage	Answer data should not be stored	High
SEC_006	Verify page source does not reveal location details	Inspect page source	Location data should not be exposed	Medium
SEC_007	Verify hidden metadata does not reveal answer location	Inspect metadata and requests	Sensitive data should be protected	High
SEC_008	Verify users cannot determine exact location using DevTools	Inspect application traffic	Actual location should remain concealed	High
SEC_009	Verify map markers do not reveal hidden location information	Inspect map interactions	No hidden location details exposed	Medium
SEC_010	Verify gameplay answer data is inaccessible before round completion	Analyze responses during active round	Answer data should remain hidden	High
SEC_011	Verify API responses contain only necessary gameplay data	Review response payloads	No sensitive information exposed	High
SEC_012	Verify coordinates cannot be copied directly from client responses	Inspect requests and responses	Coordinates should not be available	High
SEC_013	Verify browser cache does not expose answer information	Inspect cached resources	Sensitive data should not be cached	Medium

TC_ID	Test Scenario	Test Steps	Expected Result	Priority
SEC_014	Verify gameplay integrity against information disclosure	Perform exploratory testing	No answer-related data exposed	High
SEC_015	Verify network responses follow least-information principle	Review all response fields	Only required information should be shared	Medium
